Product Overview

Mobile Wireless Storage

The Maxell Portable Wireless Hard Drive allows access to your personal videos, music, photos, data wirelessly and streaming it to your mobile devices such as iPad®/Tablet, Smartphones and more. By using its internal hard drive storage, there is no need to worry about running out of space on your mobile devices.

At the same time, the Maxell Portable Wireless Hard Drive has a built in rechargeable battery. You can simply plug in to any USB port to charge and back up your files as a normal 2.5 inch hard drive. The Maxell Portable Wireless Hard Drive can also be accessed while the battery is charging.

Just one click away, within a very short time, you can start to experience the power of mobile wireless life.

Identifying the Parts

Power On/ Off Button: Switches On and Off the power of Maxell Portable Wireless Hard Drive.

LED Indicators: You can see the Wireless Hard Drive status by looking at the LED Lights on the top (upright position), please refer to “LED status Lights” section for LED indicator signals.

USB 3.0 Port: When you connect to your Notebook or PC via USB 3,0 Cable, the Maxell Portable Wireless Hard Drive can be used as a 2.5 inch portable HDD (make sure that you turn on the power)

Note: Please use 5V 2A(EIAJ-2) AC adapter.

Note: Always use 5V 2A (EIAJ-2) for DC power supply of this product, using wrong voltage AC adapter may cause damage to the product and may cause fire/smoke when over voltage is used. (AC adapter not included)

Specifications

General

Interface

- IEEE 802.11b/g/n
- USB 3.0 Micro-B

Data Transfer Rate

- Wi-Fi up to 150Mbps
- USB 3.0 up to 5Gbps

Main Chip

- Ralink RT5350
  2.4G / WPA and WPA2
- VIA Labs VL701
  USB 3.0 / SATA II

HDD Capacity

2.5" hard disk up to 1.5TB (SATA I or SATA II)

HDD Format

FAT32 / NTFS

LEDs

- Power LED : White + Blue
- Battery LED : Green + Red
- Bridge LED : Orange

System Requirement

- Wi-Fi
  iPad®, iPhone®, iPod touch® - iOS 5.0 and above
  Android tablets and smartphones - Android 2.3 and above
- USB
  Windows XP / Vista / 7 (x86 & x64) / Mac OS X 10.x

Product Dimension

127 / 92.4 / 20.9 mm

Product Weight

190g (W/O HDD & Packing)

Power Mode

Wi-Fi
Battery / Self-Powered
USB
Bus-powered / Self-Powered

Battery

Li-Polymer 2800mAh

Temperature

Operating: 0 ~ 40°C
Storage: -10 °C ~ 60°C

Humidity

Operating: 65±20% RH non-condensing

Storage: 65±20% RH non-condensing

Package Contents

USB 3.0 Micro-B 60cm Cable
Quick Guide and Manual

2 year Warranty

What’s in the Box

1 Maxell Portable Wireless Hard Drive x 1
2 Quick Guide X 1
3 USB 3.0 Cable X1

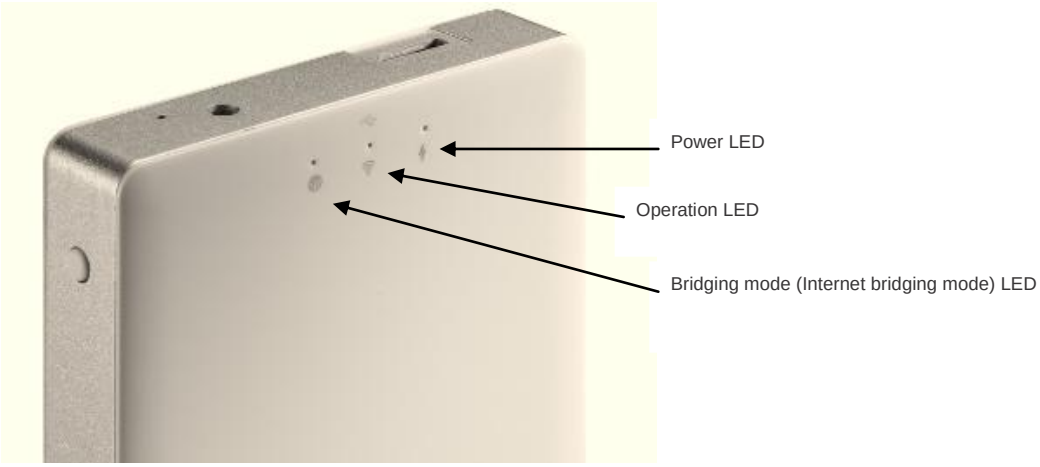
Prepare the HDD for your first use

The Maxell Portable Wireless Hard Drive is pre-formatted as FAT32.

Windows 8/7/Vista/XP users:

- Connect your Maxell Portable Wireless Hard Drive to your computer via the USB cable attached, press the on/off switch, your computer should be able to detect and install this product automatically.
- Copy video/audio/picture files to Maxell Portable Wireless Hard Drive according to the pre-set folders (Video files-> videos, picture files->Pictures)

LED status lights



Operation LED: White (Wi-Fi mode) or Blue (USB HDD mode)

In Wi-Fi mode:

- White light on : power on
- White light off : power off
- White blinking : In operation(data transfer)*

In USB HDD mode:

- Blue light on : power on
- Blue light off : power off
- Blue blinking : In operation(data transfer)*

Battery LED: Green or Red

In operation:

- Red: battery < 30%
- Off: battery > 30%

Charging mode

- Off : battery full
- Green: battery > 30%
- Orange: battery < 30%

Bridging mode(Internet bridging mode) LED : Orange

- Orange light on: bridge connection ready
- Orange light off: bridge disconnected/bridging mode off

Air-Stream App for Maxell Portable Wireless Hard Drive

The Air-Stream App is designed for and works with the **Maxell Portable Wireless Hard Drive**. You can download from iTunes App Store® or Google Play.

For how to install the App, please refer to **How to obtain the App(IOS/Android)**

Air-Stream App Features:

- Allows tablets and smartphones stream all the media files, documents wirelessly.
- Supports 5 devices streaming video at the same time.
- Supports 5 devices accessing documents, music and photos.
- File Management.
- Take and upload a photo to WiFi storage.
- Record and upload a video to WiFi storage.
- WiFi storage settings.

System Requirement:

- Android 4.0 and above.
- iOS 5.0 and above.

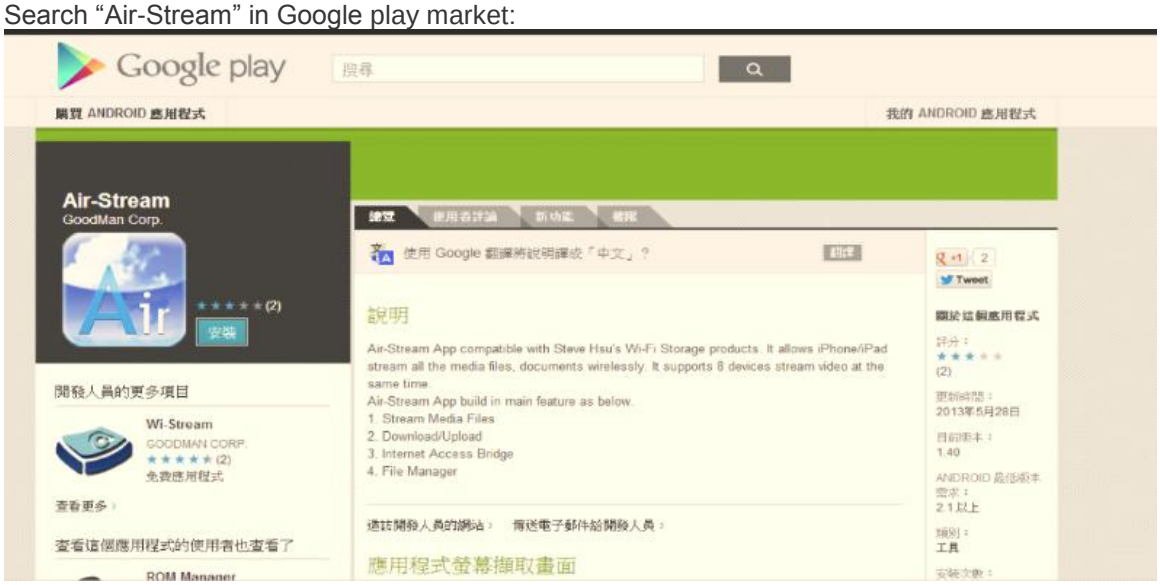
Supported File Types:

Photo	• Android bmp / gif / jpg / jpeg / png • iOS bmp / gif / jpg / jpeg / png / tiff
Video	• Android avi* / divx* / mkv / mov* / mp4 / mpg* / mpeg* • iOS mov / mp4
Music	• Android m4a / mp3 / wav / wma* • iOS m4a / mp3 / wav
Document	• Android doc* / docx* / htm / html / pdf* / ppt* / pptx* / rtf* / txt / xls* / xlsx* • iOS doc / htm / html / pdf / ppt / rtf / txt / xls

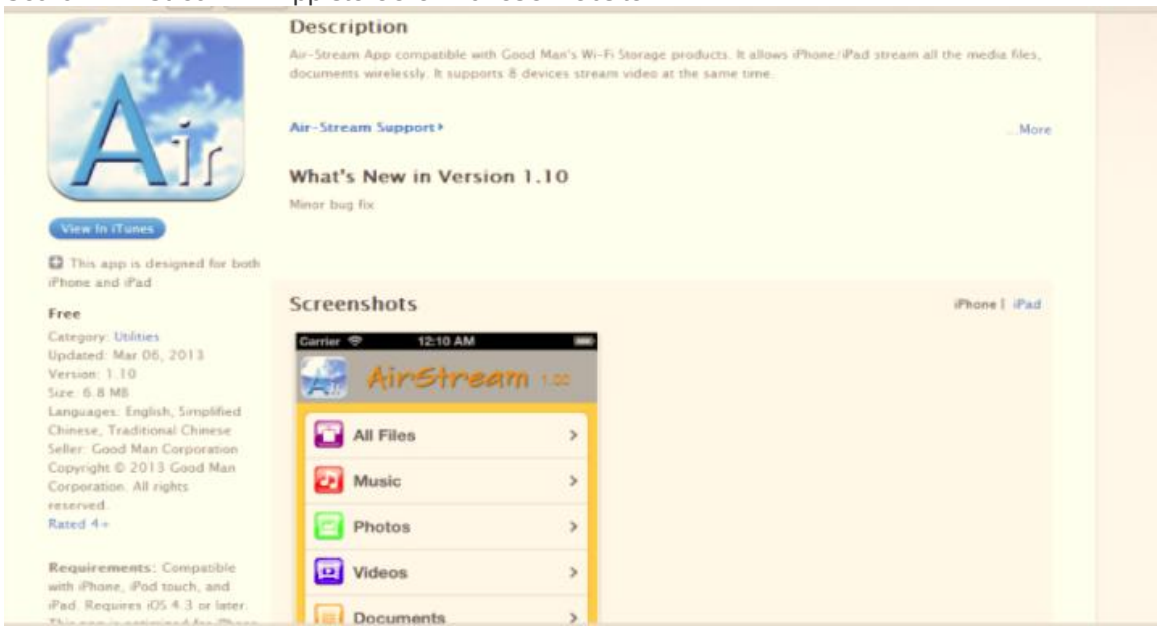
* Supported by open another app. (Android only, proper apps need to be installed).

How to obtain the App(IOS/Android)

Android devices:
Search “Air-Stream” in Google play market:



IOS devices:
Search “Air-Stream” in App store® or iTunes® website:



Air-Stream for IOS

Connecting the device:

Step 1: After installing the Air-Stream App, power on the device. Search for the wifi connection named “Max-Stream_xxx”

(xxx is the last 4 digit of the MAC address of your device.)

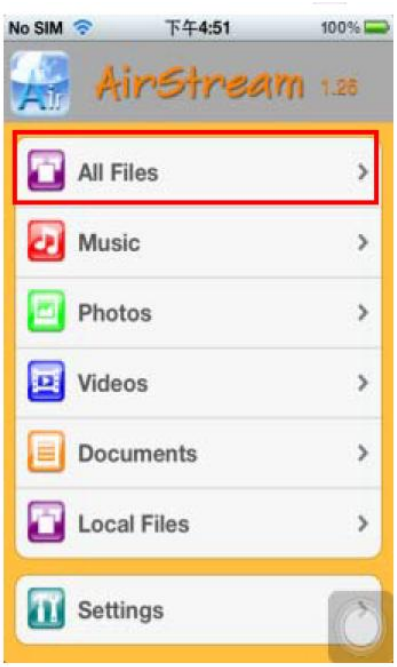
Tap MAX-Stream_XXX on the Wi-Fi Manager, and then enter password **12345678**.

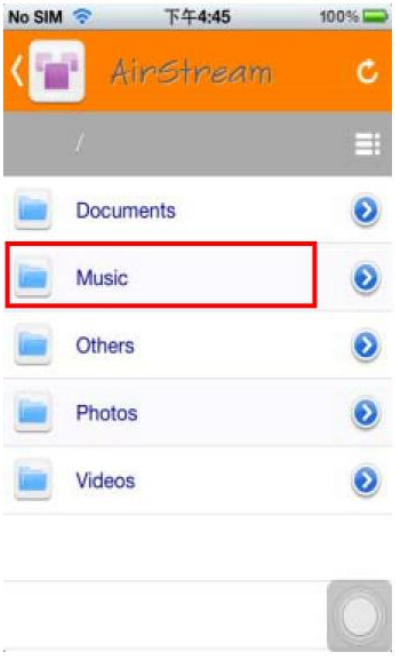
Step 2: After successful connected to Maxell Portable Wireless Hard Drive, launch the Air-Stream App by tapping the icon.

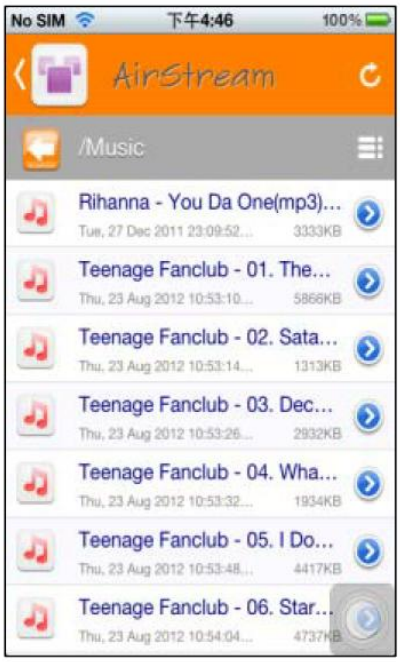
I. Browse Files

Browse all the files, including documents, music, photos, and videos, on the remote device (Portable Wireless Hard Drive), or the local files on the local side (your Smartphone/Tablet/device).
To browse MP3 files as an example. All files> Music > *.mp3
Step 1. Tap All Files
Step 2. Tap music folder to browse all MP3 files.
Step 3. Tap a file to play music.

Back: Tap the icon on the grey bar to go back the previous layer.
Main menu: Tap the icon on the upper left corner to return to the Main Menu.





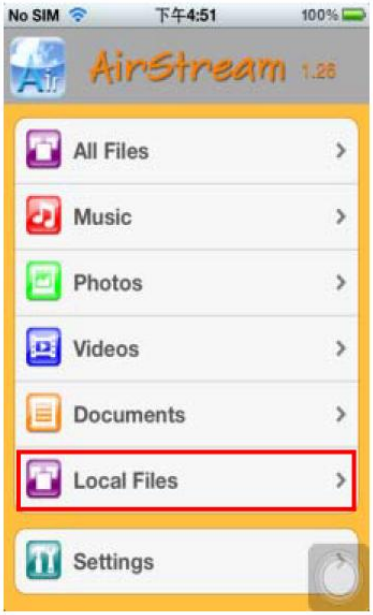


II. Upload files

Upload files from the local files to Maxell Portable Wireless Hard Drive.
Upload files from Local Files to the remote device. The App will upload files to the target folder according to filename extensions, including documents, music, photos, and videos. Other kinds of files will go to the Others file folder.
Example on how to upload music files.
Step 1. Tap Local Files.
Step 2. Tap Music (Music)

Step 3. Select music files and tap upload , or tap to select all music files.
Step 4. Tap Upload on the grey bar at the bottom. Or tap X to cancel.

You can use the same way to upload other files such as documents, photos, videos, and other kinds of files.



III. Download files

Download files from the Maxell Portable Wireless Hard Drive to local storage.

Download files from the Maxell Portable Wireless Hard Drive, including documents, music, photos, and videos, to Local Files, and the App will download files to your target folder according to filename extensions. For files not defined as music, such as photos, videos, or documents – these will go to the Others folder.

There are two ways to download music files.

1. All Files >Music > mp3 songs

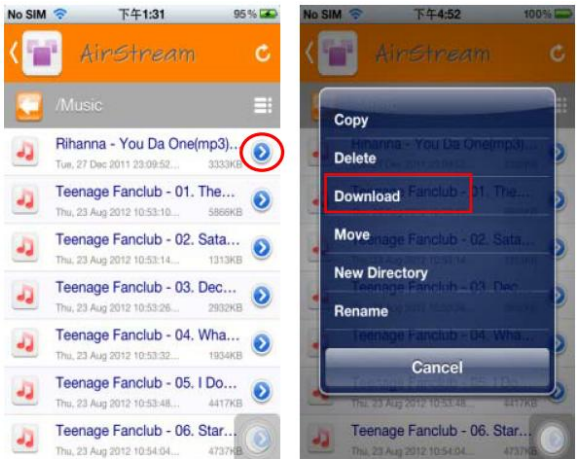
Step 1. Tap All Files >Music Music

Step 2. Tap the blue icon on the right of a music file

Step 3. Select Download, or tap to select all music files.

Step 4. Tap Download on the gray bar at the bottom. Or tap X to cancel.

You can use the same way to download other files such as documents, photos, videos, and other kinds of files.



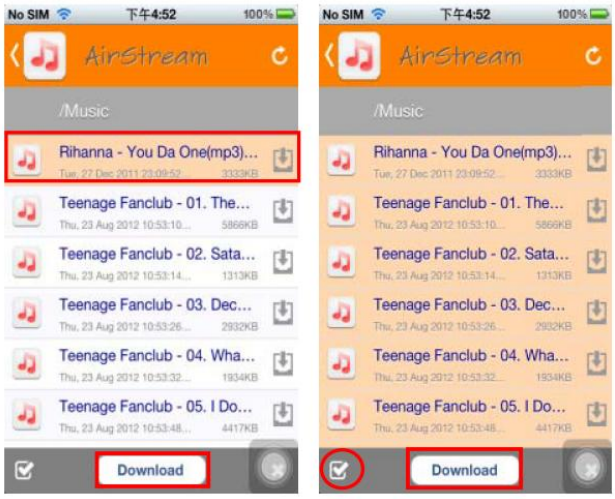
2.

Step 1. Tap Music Music

Step 2. Select music files and tap , or tap to select all music files.

Step 3. Tap Download on the gray bar at the bottom. Or tap X to cancel the action.

You can use the same way to download other files such as documents, photos, videos, and other kinds of files.



IV. Move files/folders

You can move a file or a folder within the app, below are the steps on moving file/folders

1. Move a file:

Move a file from a files folder to a target folder:
For example: to move a music file:
All Files > Music
Step 1. Tap All Files and then tap Music

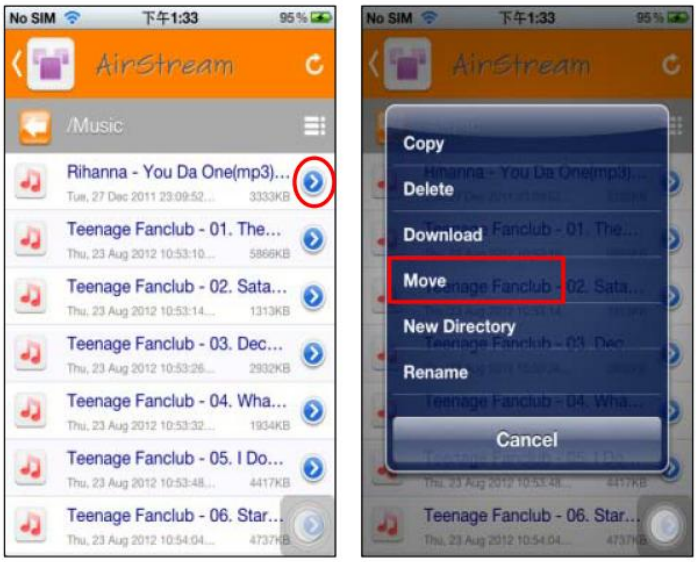
Step 2. Tap the blue icon on the right of a music file.

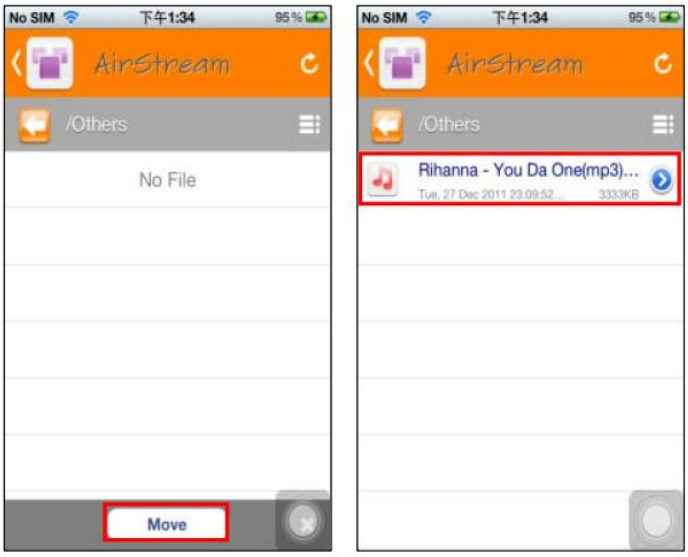
Step 3. Select Move

Step 4. Go to target folder. Ex. /Music → / Others

Step 5. tap Move on the bottom bar. Or tap X to cancel.

You can use the same way to move other folders such as documents, photos, videos, and other kinds of files.





2. Move a folder

Move a file folder to another location.
For example: To move a file folder named 01. favourite
(Please see New Directory on how to add a new folder)

All Files > 01.favorite → All Files > Music > 01. Favorite

Step 1. Tap All Files

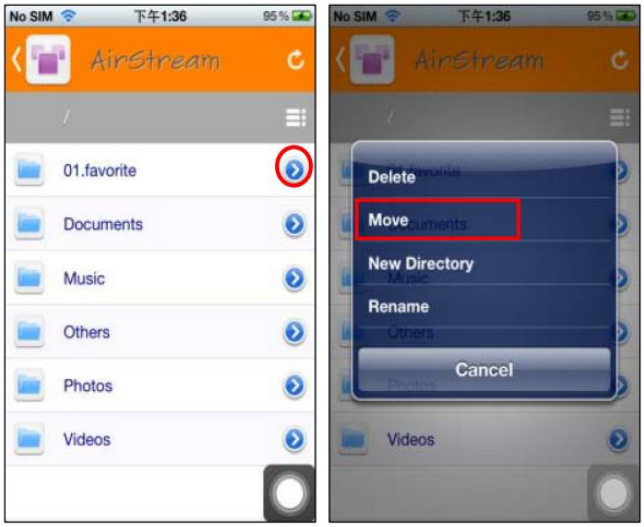
Step 2. Tap the blue icon on the right to the folder.

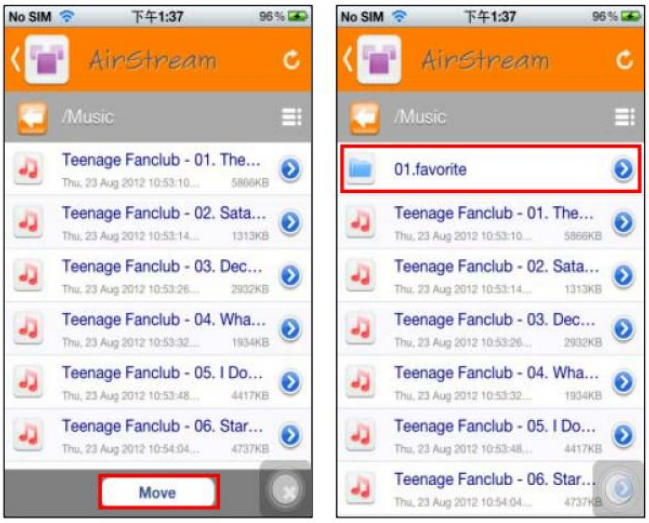
Step 3. Select Move.

Step 4. Tap Music folder

Step 5. Tap Move on the bottom bar. Or tap X to cancel.

You can use the same way to move other files such as documents, photos, videos, and other kinds of files.





V. Copy files

Copy files and paste to the target file folder.

For example, copy a music file from folder to folder.

All Files > Music > *.mp3 → Others >

Step 1. Go to All Files > Music.

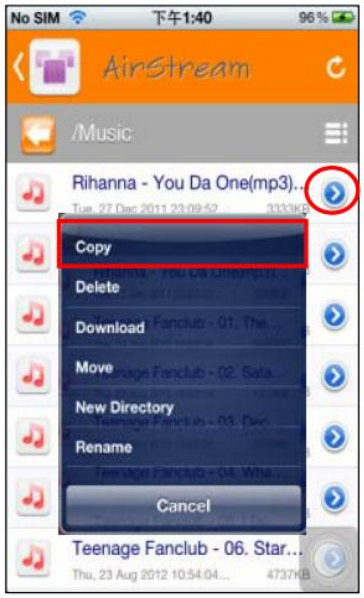
Step 2. Tap the blue icon on the right of a music file.

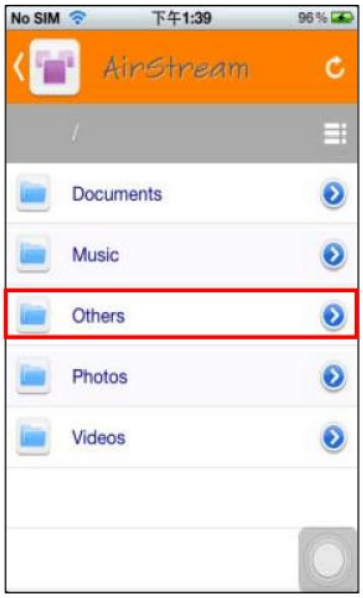
Step 3. Select Copy.

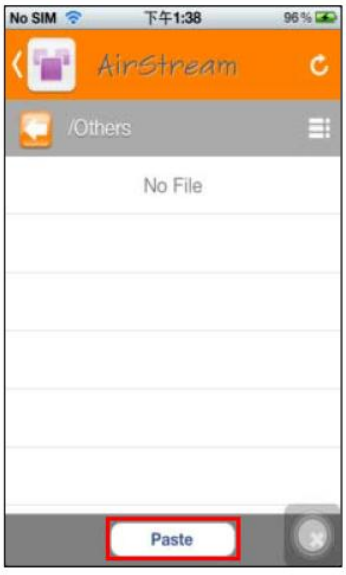
Step 4. Go to target folder. Ex. / Music → Others

Step 5. Tap Paste. Or tap X to cancel.

You can use the same way to copy other files such as documents, photos, videos, and other kinds of files.







VI. File Folder Variation

i. Rename

Example. Rename Rihanna-You Da One(mp3) to be 01.Rihanna-You Da One(mp3).

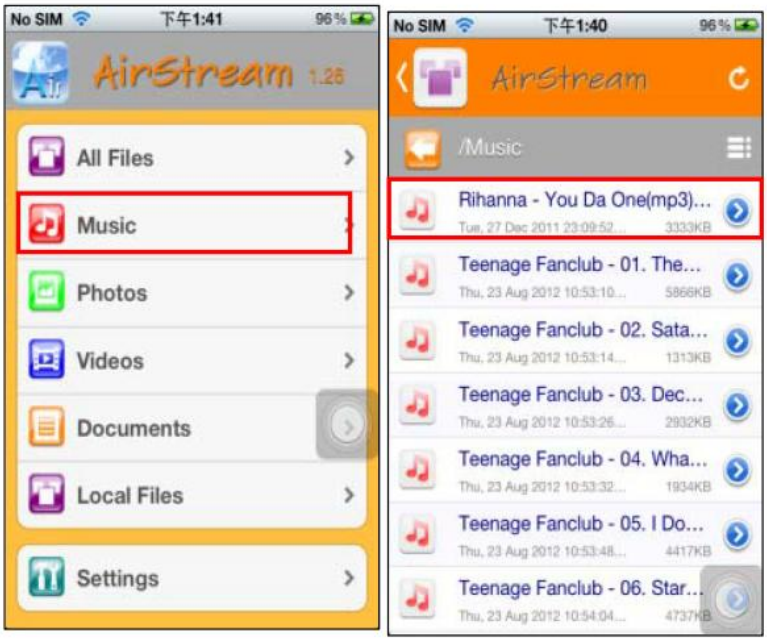
All Files > music

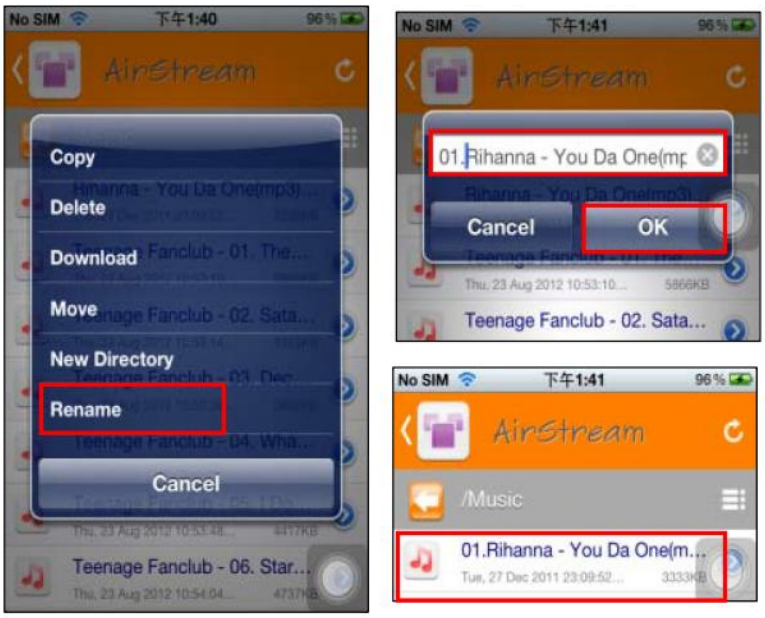
Step 1. Tap the blue icon next to the file you want to rename. ex. Rihanna-You Da One(mp3)

Step 2. Select Rename.

Step 3. Modify file name 01. Rihanna-You Da One(mp3) and tap OK. Or to tap Cancel to cancel this operation.

You can use the same way to copy other files such as documents, photos, videos, and other kinds of files.





ii. New Directory

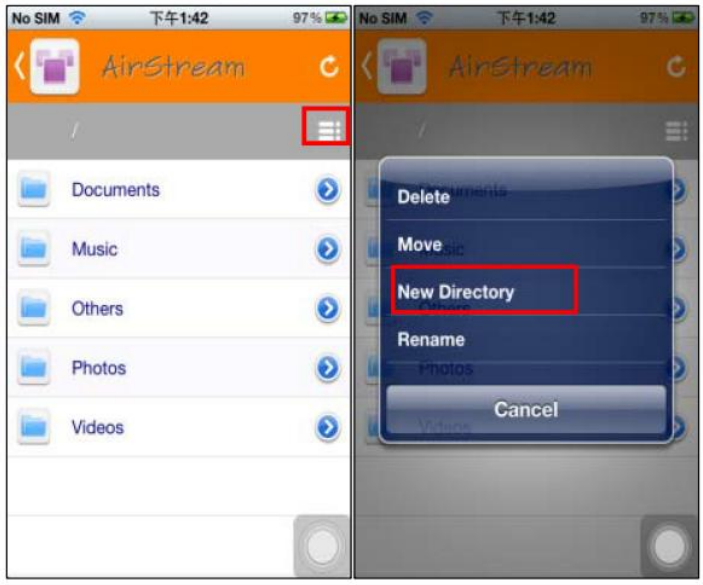
Add a new file folder.
There are two ways to add new file folders.

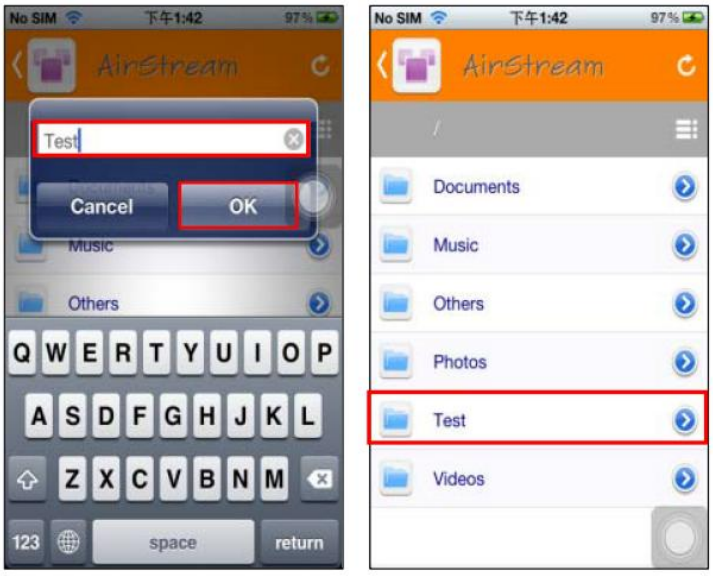
In folder view page:
Step 1. Tap the blue icon next to a file folder (Document/ Music / Photos/ Videos).

Step 2. Tap New Directory.

Step 3. Enter a name for the new folder.

Step 4. Tap OK. Or tap Cancel to cancel this operation.





iii. Delete Files/Folders

Delete files or file folders.

For example, delete all files in a folder

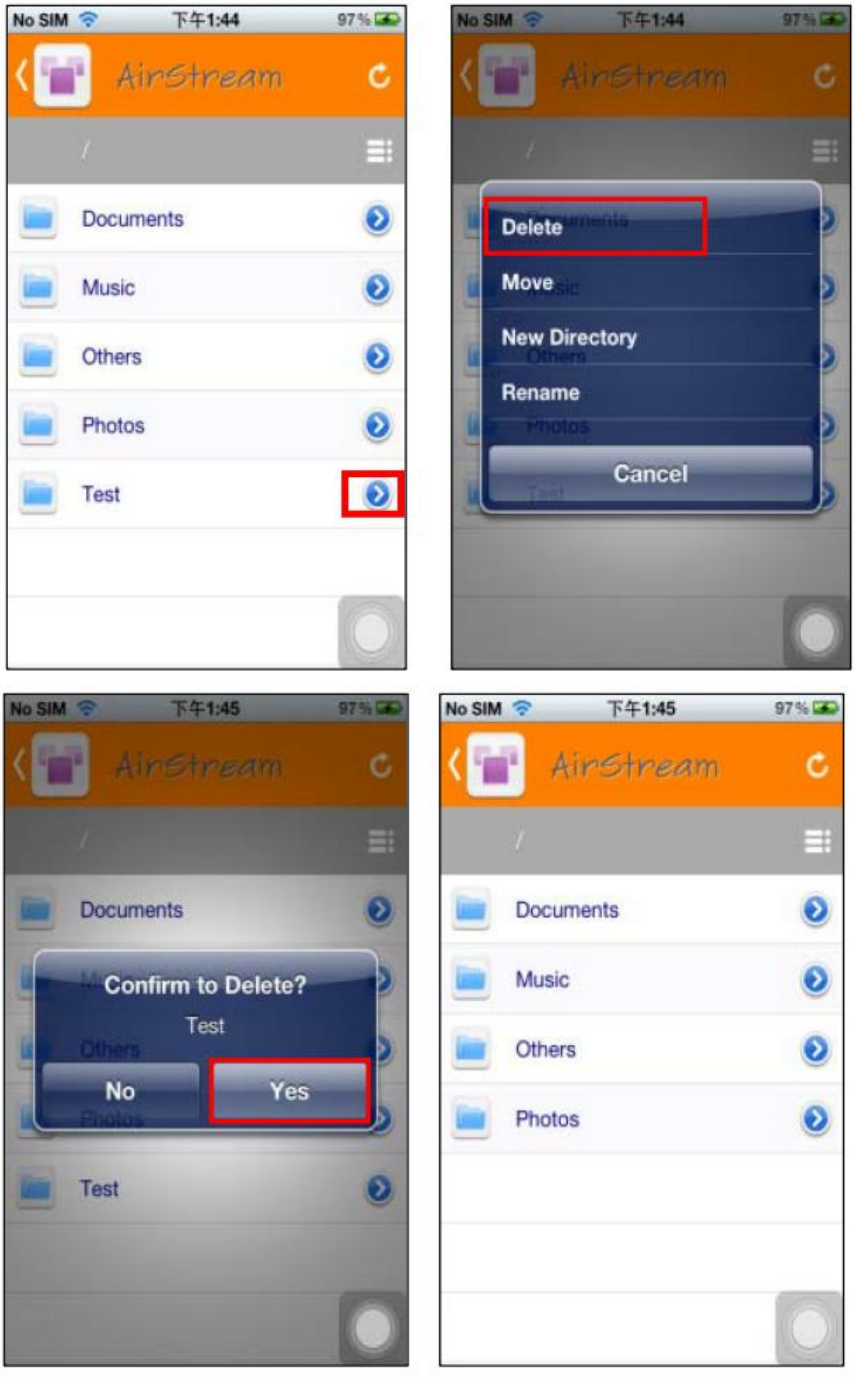
Step 1. Tap the blue icon next to the file folder that you want to delete.

Step 2. Select Delete

Step 3. Tap Yes to confirm. Or tap No to cancel.

You can apply the same procedure when deleting a file.

If you delete the default folders, like “Documents”, “Others”, “Photos”, “Videos”, or “Music”, it will be rebuilt once the device restarts.



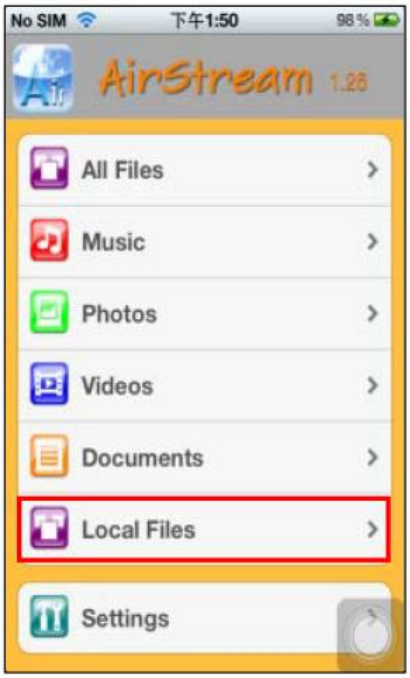
VII. Settings

i. Username and Password

Enter the username and password
Setting page allows users to change the setting on your Maxell Portable Wireless Hard Drive
Enter username and password

1. Once you tap Settings, it will pop up a login box, asking you to enter the username (admin) and your password (admin).

2. Then tap Login.



ii. Device Name (SSID)

Note: The device name is equal to the SSID of the wifi connection of this Maxell Portable Wireless Hard Drive.

Step 1. Tap Device Name.
Step 2. Enter new device name and tap Apply.
Step 3. The device will automatically reset, please connect again.

iii. Security Setting

Set up security password and security status.

Default password is **12345678.** You can set your own password.

Security:

i) Enable means to enter password (Default: **12345678**) when login the device.

ii) Disable means to disable password requirement when connect the device.

iv. Internet Access (Internet Bridge)

This device has an internet bridging function which enables users to connect to the Internet through their Smartphone/Tablet/device (using the Air-Stream App).

Disable means the device doesn't open Internet access, and it only provides Wi-Fi connection with the Notebook/Tablet or the Smartphone.

Enable means the device provides Internet access, which lets users connect to the internet.

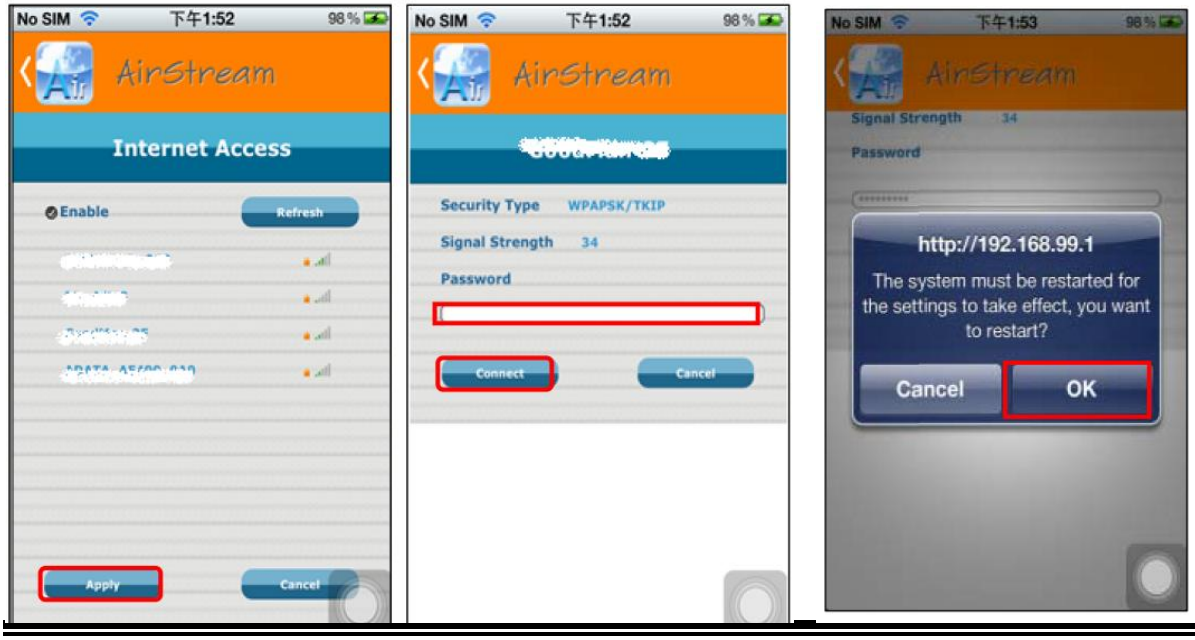
Step 1. Tap Enable to turn on Bridge mode. It will search available internet access points(AP).

Step 2. Tap on the AP you want to connect and tap Apply.

Step 3. App will ask you to provide internet password, and then tap Connect.

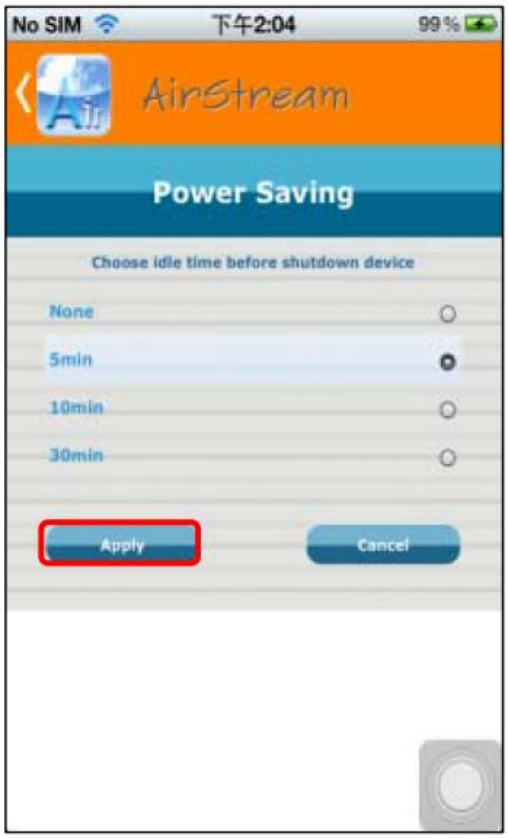
Step 4. It will ask for permission to restart.

Step 5. Tap OK and it will pop up a restarting countdown message.



V. Power Saving

Set up idle time (5 min/ 10 min/ 30min) to avoid power consuming.
The device will shut down after idle time.
None means that the device will not operate the power saving function.
Select idle time and tap Apply to confirm; otherwise Cancel the action.

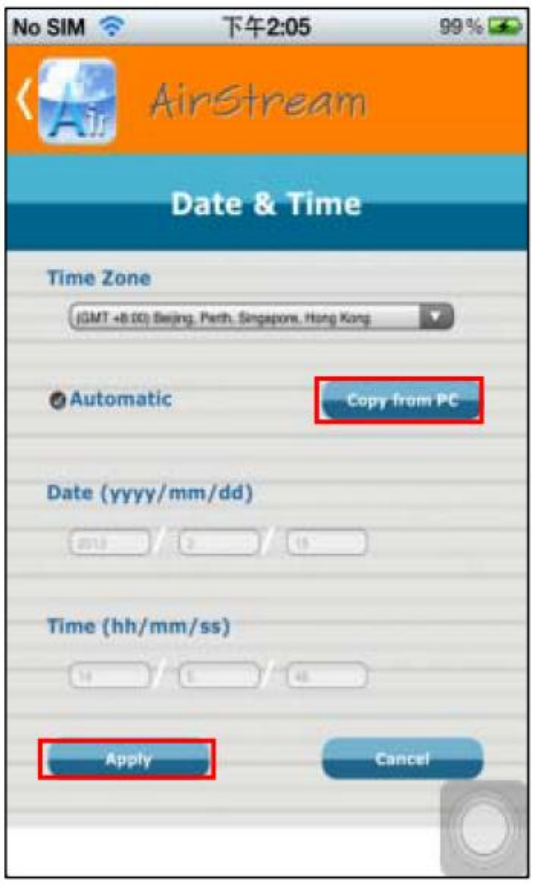


Vi. Date & Time

Date & Time will show up after file uploading or file downloading.

There are two ways to set this up:

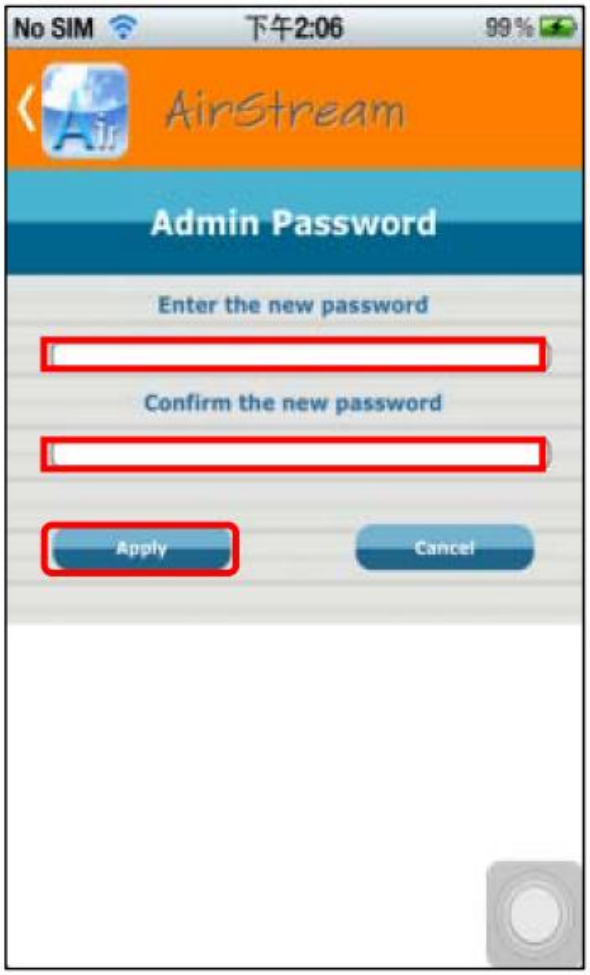
1. Select Time Zone from the drop-down list and key in the date and time separately.
2. Tap Copy from PC to get information from Notebook or smartphone directly.
3. Tap Apply to confirm. Or tap Cancel to leave.



Vii. Admin Password

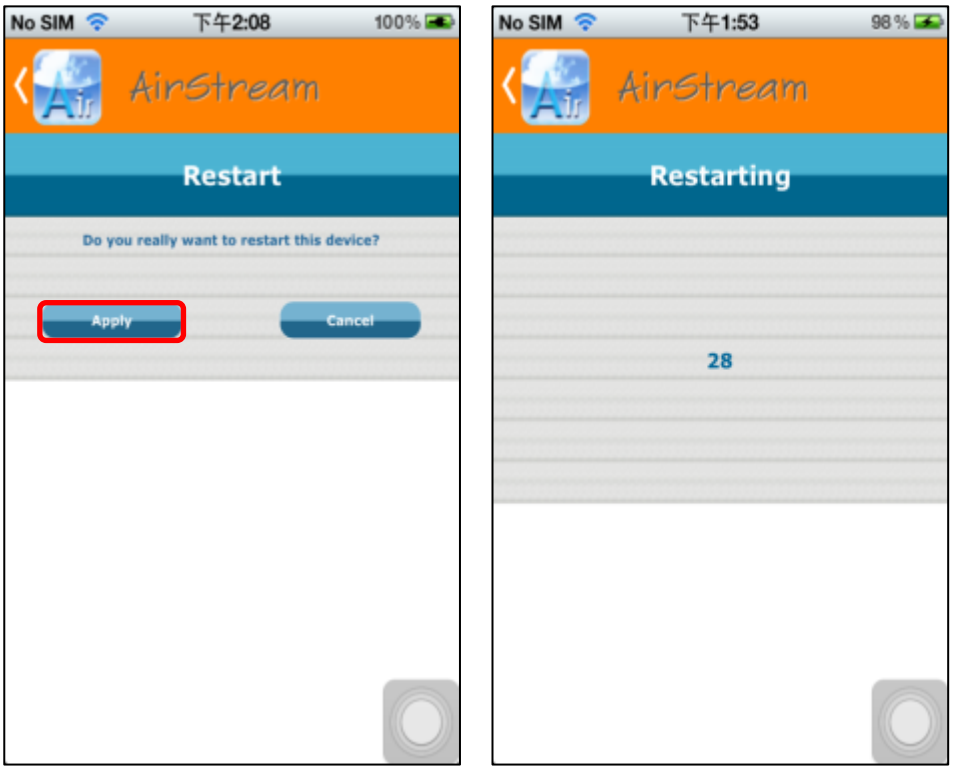
Change password through the login Settings page.

Enter the new password and confirm the new password. Tap Apply to set up new admin password, or Cancel and leave.



Viii Restart

Restart the device.
Tap Apply to restart, or tap Cancel to leave.



iX. Firmware Upgrade

Upgrade the firmware when there is a new update available. You can upgrade the Portable Wireless Hard Drive by uploading new firmware.

1. Download the firmware file to a computer.
2. Connect with the Portable Wireless Hard Drive using that computer.
3. Tap Choose file to search for the upgrade firmware in the USB drive.
4. Tap Upload after the firmware file is chosen. Or tap Cancel to leave.

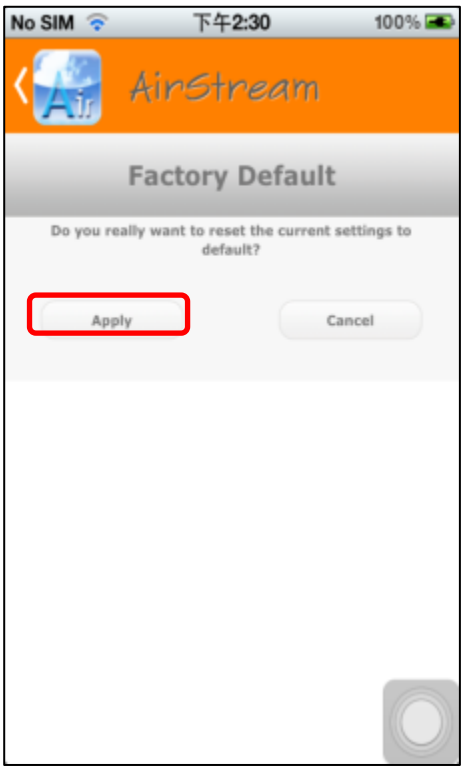
Do not shut down power during upload.

X. Shutdown

Tap Apply to shut down the device, or tap Cancel to leave.

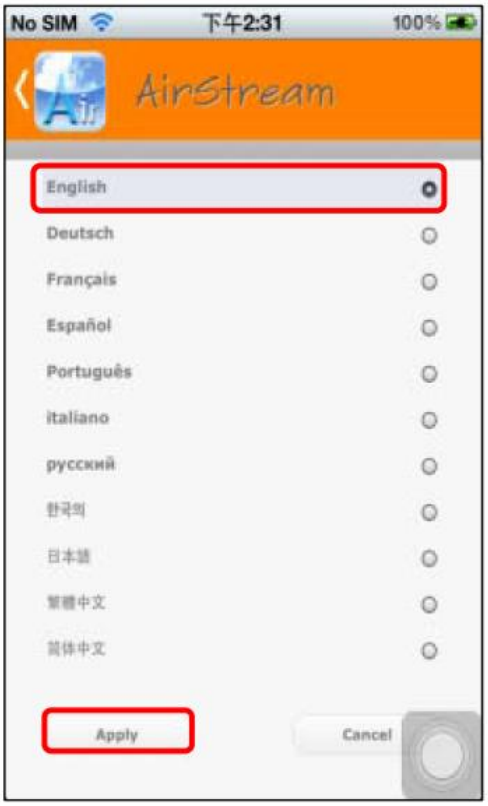
Xi. Factory Default

Tap Apply to reset settings to default value.
The Maxell Portable Wireless Hard Drive will restart.



Xii. Language

Select a language for the app interface.
Tap Apply to confirm, or tap Cancel to leave.



- REMARK: Please charge the Maxell Portable Wireless Hard Drive fully after each use, sudden power outage during operation can result in damage/or loss of your data.

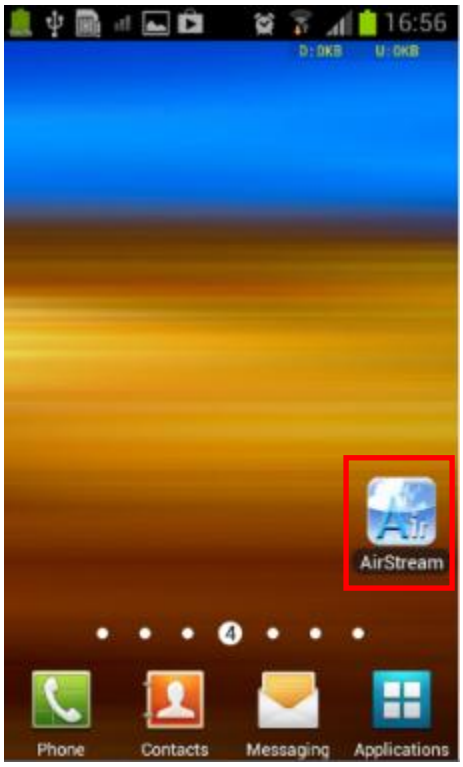
Air-Stream Manual for Android

<Use an Android smartphone to connect remote Air-Stream Device>

Step1：Go to Google play Store search Air-Stream App (iOS / App Store), and download it.

Step2：After installing Air-Stream App, power on the device to link to Wi-Fi.
Tap Wi-Stream_XXX on the Wi-Fi Manager, and then enter password **12345678**.

Step3. Launch Air-Stream by tapping the icon to login Air-Stream App.



VIII. Browse files

Browse all files, including documents, music, photos, and videos, on the remote device, or the local files on the local side.

To browse MP3 files as an example. All files> Music > *.mp3

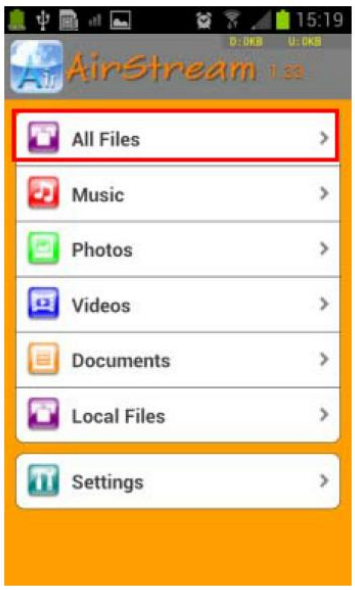
Step 1. Tap All Files

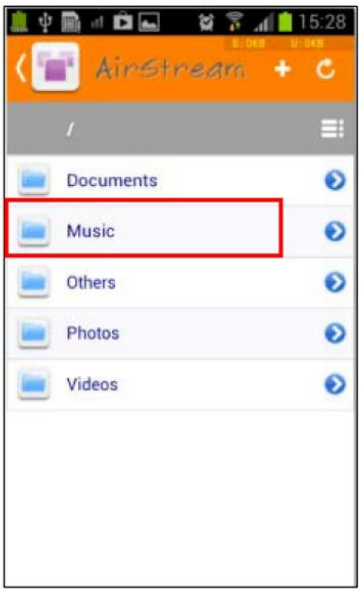
Step 2. Tap music folder to browse all MP3 files.

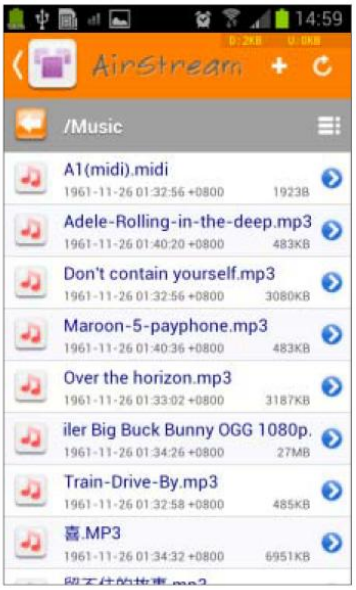
Step 3. Tap a file to play music.

Back: Tap the icon on the gray bar to go back the former layer.

Main menu: Tap icon on the upper left corner to return to main menu.







IX. Upload files

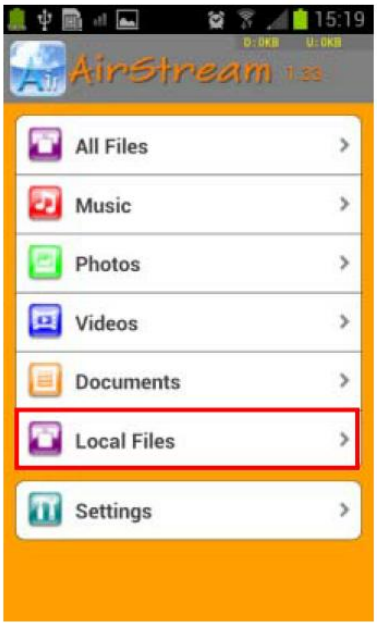
Upload files from the local files to remote device.
Upload files from Local Files to the remote device. App will upload files to target folder according to filename extensions, including documents, music, photos, and videos. Other kinds of files will go to Others file folder.
Example on how to upload music files.
Step 1. Tap Local Files.

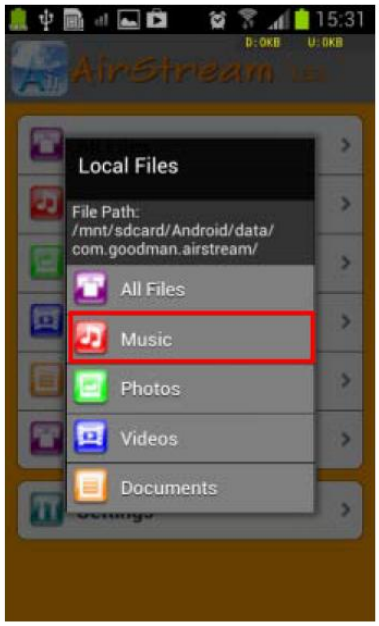
Step 2. Tap Music

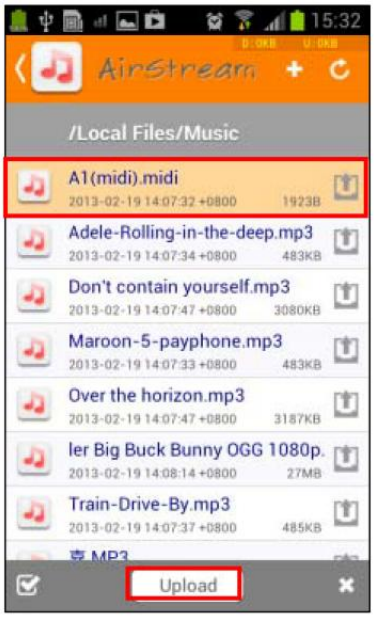
Step 3. Select music files Music and tap upload, or tap to select all music files.

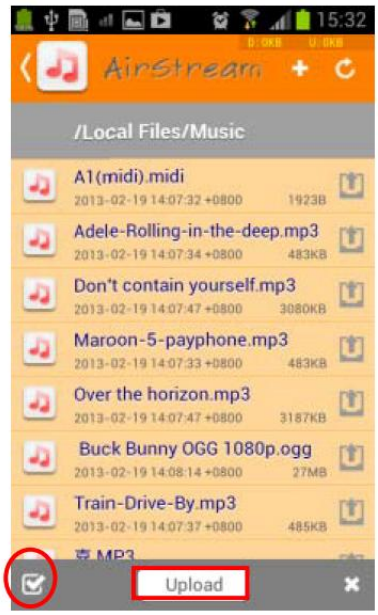
Step 4. Tap Upload on the gray bar at the bottom. Or tap X to cancel.

You can use the same way to upload other files such as documents, photos, videos, and other kinds of files.









X. Download files

Download files from the remote device to local files. User can open the files by their installed apps in their Android device.

There are 2 ways to download files.

For example:

1. All Files >Music > *.mp3

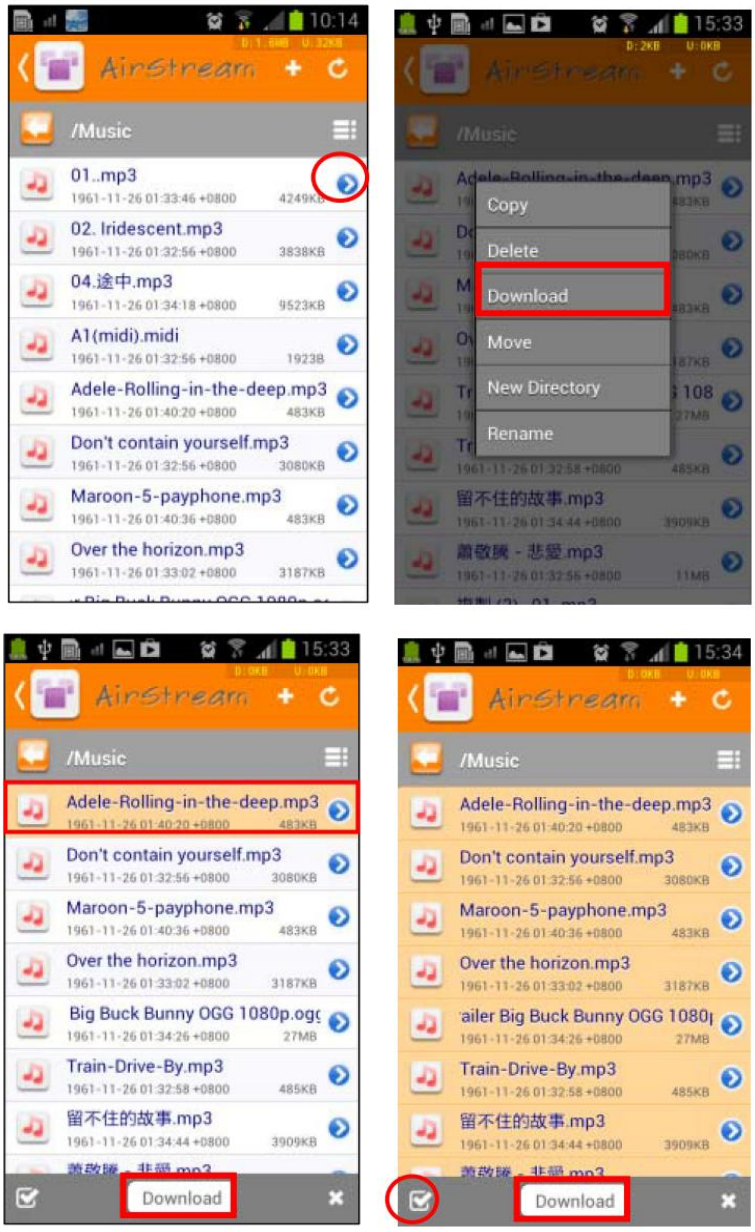
Step 1. Tap All Files >Music

Step 2. Tap the blue icon on the right side of a music file

Step 3. Select Download, or tap to select all music files.

Step 4. Tap Download on the gray bar at the bottom. Or tap X to cancel.

You can use the same way to download other files such as documents, photos, videos, and other kinds of files.



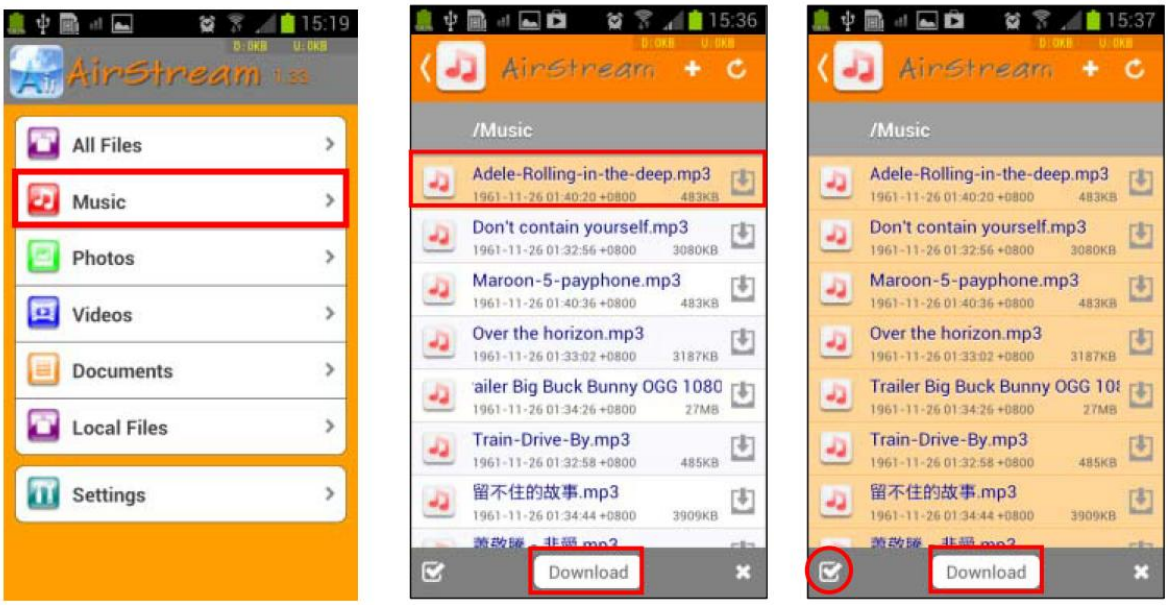
2. Music > *.mp3

Step 1. Tap Music

Step 2. Select music files and tap , or tap to select all music files.

Step 3. Tap Download on the gray bar at the bottom. Or tap X to cancel the action.

You can use the same way to download other files such as documents, photos, videos, and other kinds of files.



XI. Move files & folders

Move a file

Move a file from a files folder to a target folder:

To move a music file as an example:
All Files > Music

Step 1. Tap All Files and then tap Music

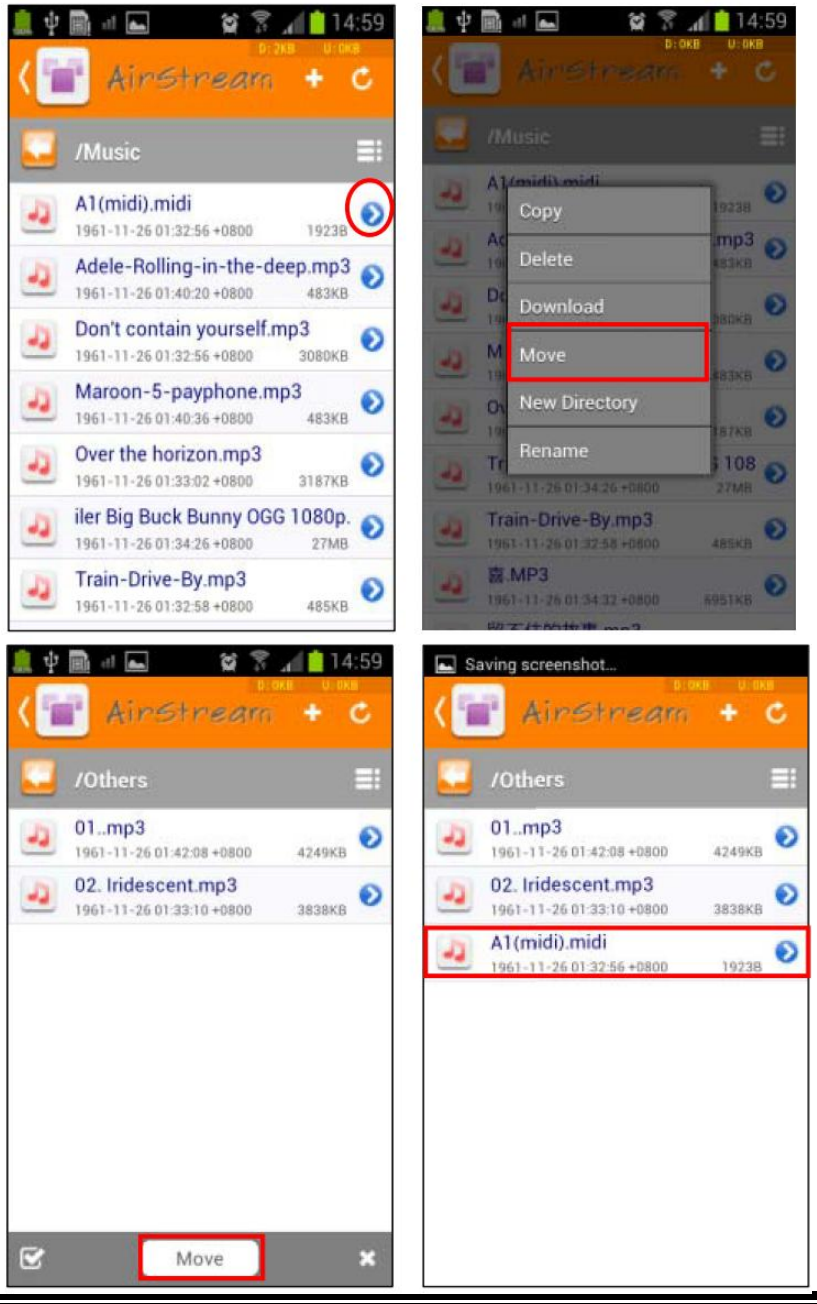
Step 2. Tap the blue icon on the right of a music file.

Step 3. Select Move

Step 4. Go to target folder. Ex. /Music → / Others

Step 5. tap Move on the bottom bar. Or tap X to cancel.

You can use the same way to move other files such as documents, photos, videos, and other kinds of files.



Move a file folder

Move a file folder to a target file folder.
To move a file folder named 01. favorite as an example:
(Please see introduction of New Directory to add a new folder)

All Files > 01.favorite → All Files > Music > 01. favorite

Step 1. Tap All Files

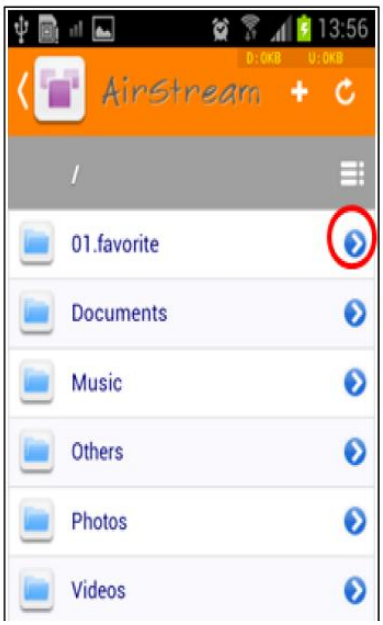
Step 2. Tap the blue icon on the right to the folder.

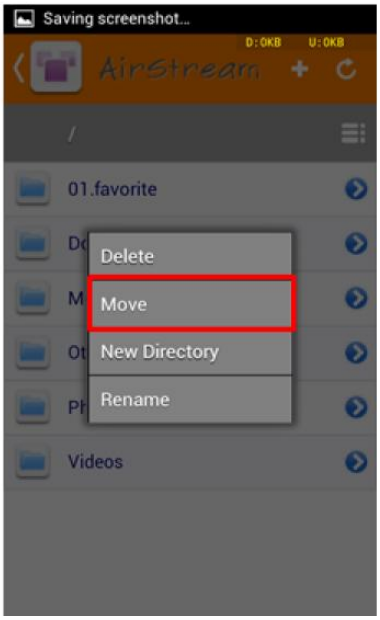
Step 3. Select Move.

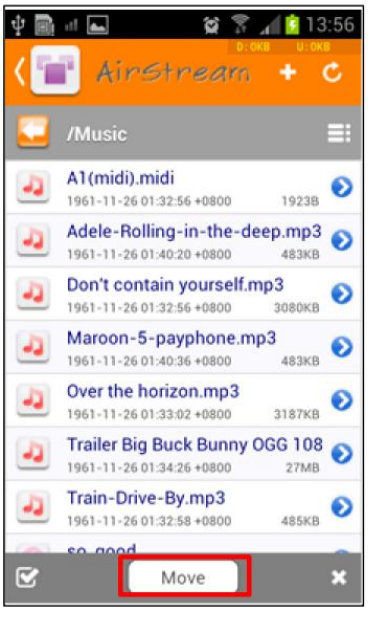
Step 4. Tap Music folder

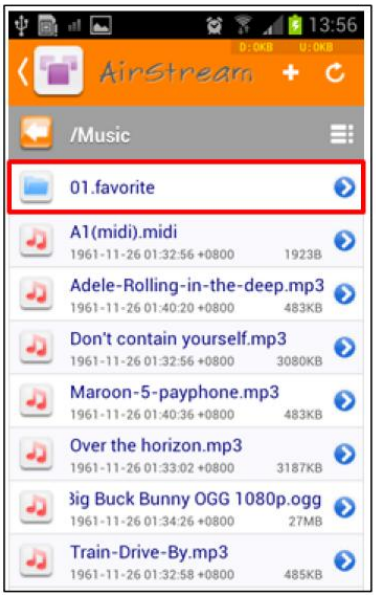
Step 5. Tap Move on the bottom bar. Or tap X to cancel.

You can use the same way to move other file folders such as documents, photos, videos, and other kinds of file









XII. Copy files.

Copy files and paste to the target file folder.
Copy a music file as an example.

All Files > Music > *.mp3 → Others >

Step 1. Go to All Files > Music.

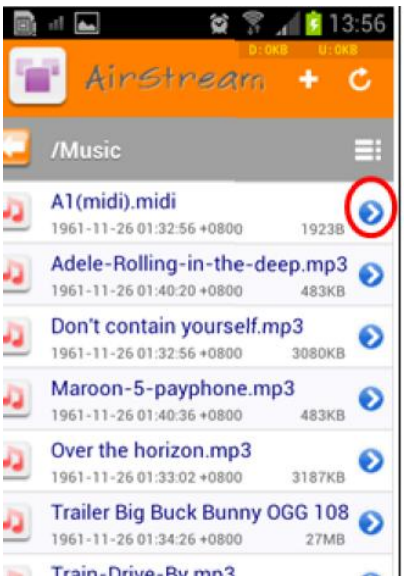
Step 2. Tap the blue icon on the right of a music file.

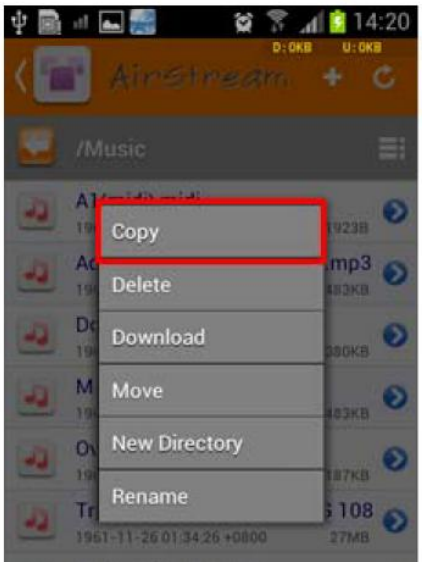
Step 3. Select Copy.

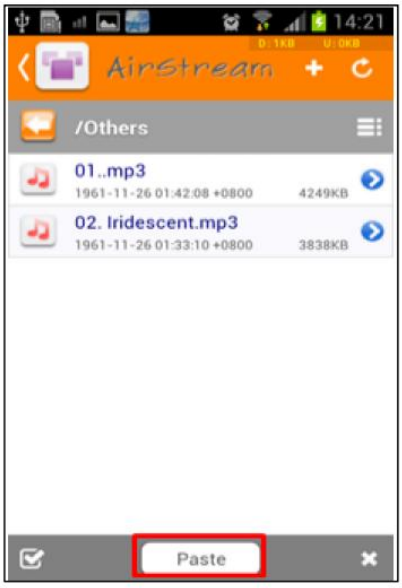
Step 4. Go to target folder. Ex. / Music → > Others /

Step 5. Tap Paste. Or tap X to cancel.

You can use the same way to copy other file folders such as documents, photos, videos, and other kinds of file





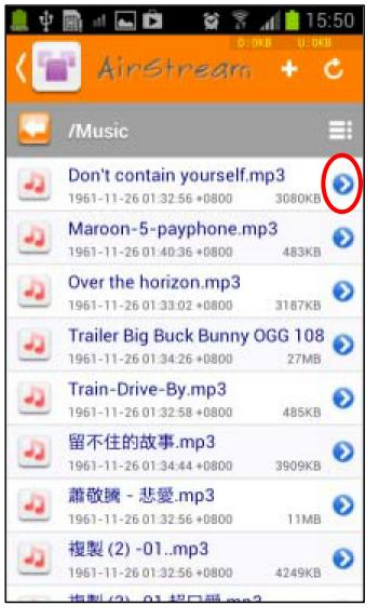


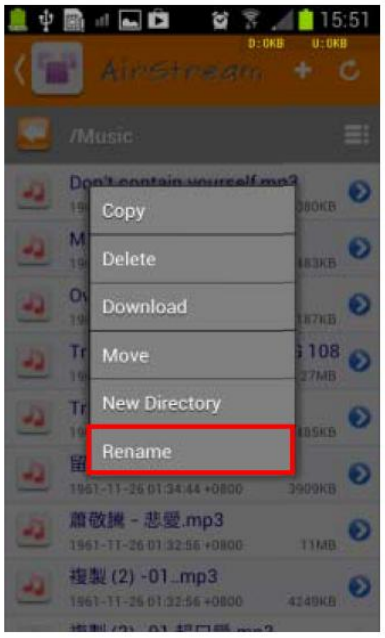
XIII. File Folder Variation

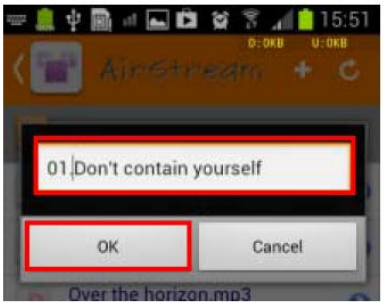
i. Rename

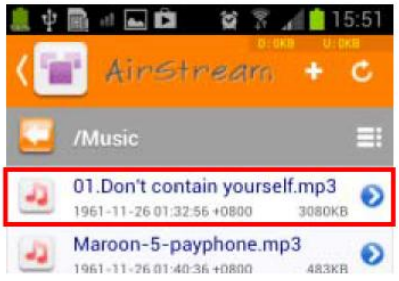
Rename for file folders or files.
Example. Rename Don't contain yourself.mp3 to be 01.Don't contain yourself.mp3.
All Files > music/
Step 1. Tap the blue icon next to the file you want to rename. ex. Don't contain yourself.mp3
Step 2. Select Rename.
Step 4. Modify file name 01.Don't contain yourself.mp3 and tap OK. Or to tap Cancel to cancel.

You can use the same way to rename other file folders such as documents, photos, videos, and other kinds of file









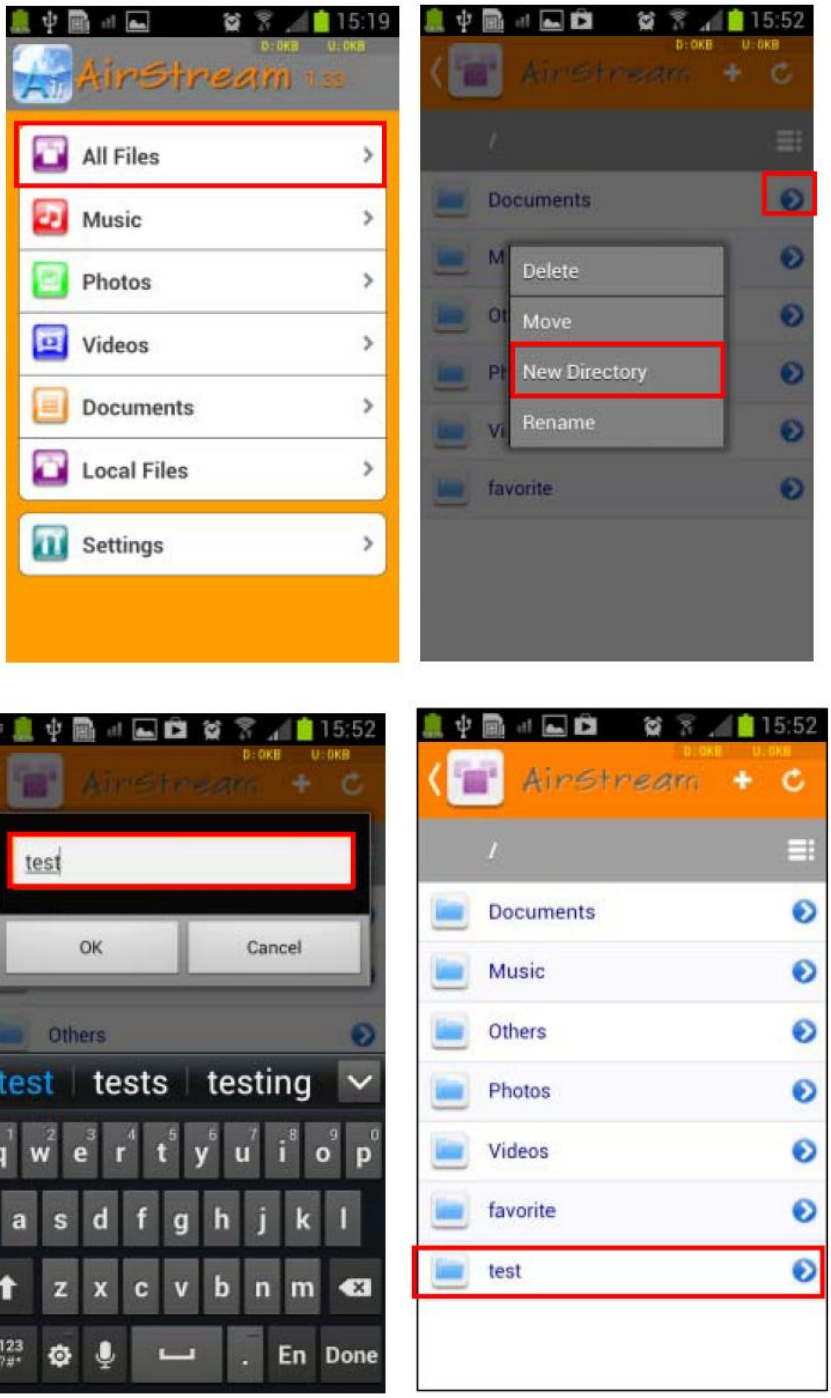
ii. New Directory

Add a new file folder.

There are two ways to add new file folders.

1. All Files >

Step 1. Tap the blue icon next to a file folder (Document/ Music / Photos/ Videos).
Step 2. Tap New Directory.
Step 3. Enter a name for the new folder.
Step 4. Tap OK. or tap Cancel to cancel.



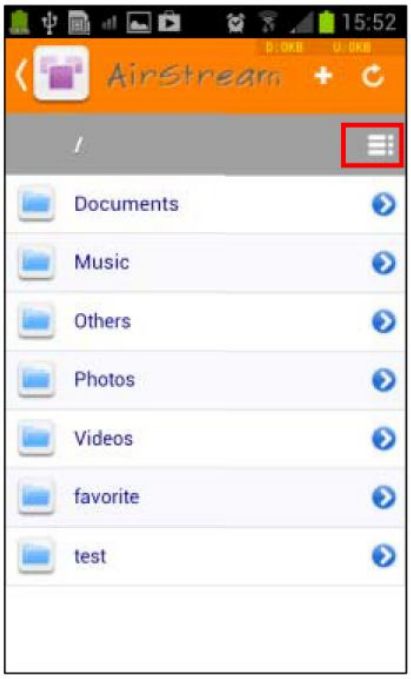
2 .All Files >

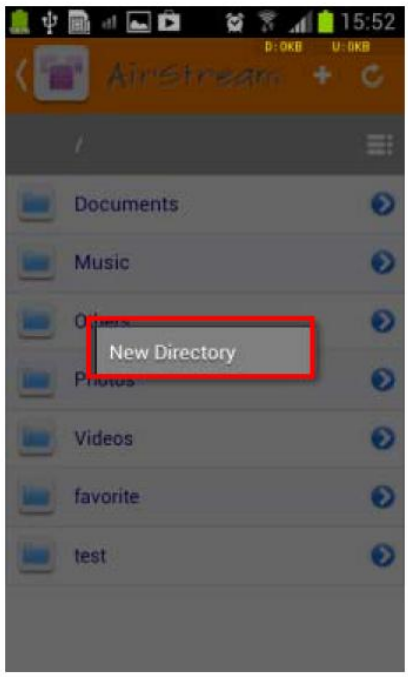
Step 1. Tap the gray icon on the upper right.

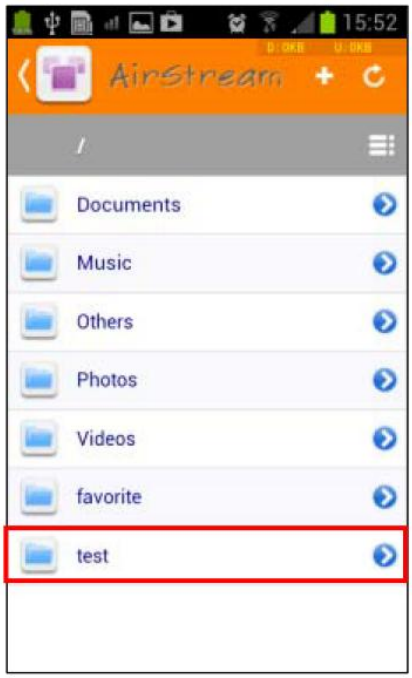
Step 2. Tap New Directory.

Step 3. Enter a new name for the new folder.

Step 4. Tap OK. Or tap Cancel to give up.







iii. Delete Files

Delete files or file folders.

Delete file folders.

Ex. All Files/

Step 1. Tap the blue icon next to the file folder that you want to delete.

Step 2. Select Delete.

Step 3. Tap Yes to confirm. Or tap No to cancel.

If you delete the default folder, like Documents, Others, Photos, Videos, or Music, it will be rebuilt once the device restarts.

Troubleshooting

To keep the warranty valid, never try to repair the system yourself. If you encounter problems when using this unit, check the following points before requesting for service. Warranty void if case is opened.

Symptom	Likely Cause	What to do
No LED lights come on after the on/off button is pressed	Battery is empty	• Charge with USB AC adapter or computer via USB cable. Green charging light will light up during charging.
	Power is not switched on	• Switch on power and verify that power LED is on. (Middle white LED flashing)
Portable Wireless HDD suddenly stops working	Triggered auto-off function (no operation left for too long)	• Press on/off button to turn on again • See symptom above.
I can see the Wifi connection but I cannot connect from my mobile device	Wifi password incorrect	• Check Wifi password(Upper/lower case must be exactly the same)
	Wifi encryption not compatible	• Use different wireless encryption method. Please refer to Security section for setting up wireless encryption.
	Wrong Wifi network selected	• Check and make sure the SSID is correct and connect again.
I have forgotten the Wifi password I have set up	-	• Please refer to Resetting the Maxell Portable Wireless Hard Drive section
The Portable Wireless Hard Drive is not showing up on my PC/Notebook	Not enough power in the Portable Wireless Hard Drive	• Please plug in the Maxell Portable Wireless Hard Drive into the root connector of your PC/Notebook USB port. • Make sure the green charging light is on

		before you turn on the Maxell Portable Wireless Hard Drive.

Important Safety Instructions

Warning!
Do not use in a rainy or snowy place, by the waterside or in the bathroom. It may cause fire or electric shock.

Caution!
Do not keep in an excessively hot place such as radiators, heaters, stoves, or other apparatus (including amplifiers) that produce heat. The surface of the device or parts may get damaged, and may also cause fire. Do not keep especially in a closed car in summer, and in a place where sunlight directly falls or near a stove. This may cause leakage of battery fluid.
Always use 5V 2A (EIAJ-2) for DC power supply of this product, using wrong voltage AC adapter may cause damage to the product and may cause fire/smoke when over voltage is used. (AC adapter not included)
